• INNOVATION • R&D • SERVICE
创新 • 研发 • 服务

我们有着追求和谐的理想，有着崇尚创新的心态，有着研发的视野，有着服务的思维。
多年的市场历练，抛弃了急躁、浮华与喧嚣，沉淀着严谨、务实、高效。

致臻的创新探索，抛却了浪费、过时与陈旧，蜕变着时尚、潮流、和谐。

We pursue the ideal of a harmonious, advocate innovation, has a vision of R & D, with the services of thinking. Years of market experience, and forsook the impatience, the glitz and bustle, the sediment of a rigorous, pragmatic and efficient.

Several years of innovative exploration, discard waste, outdated and obsolete transformed with fashion, trend, harmony.

Go for the dreams and Spread Your Wings

展翅飞翔 / 梦想与希望

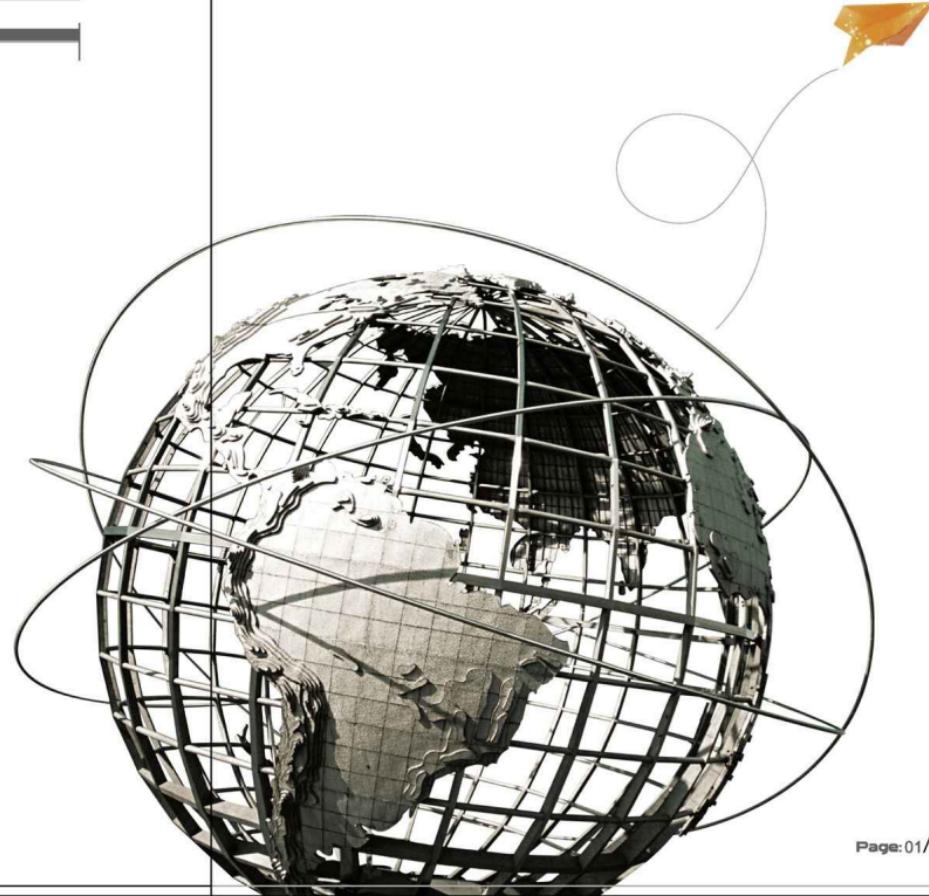

卷首语

● “以实力，让生活变得舒适；凭精品，让人居达致完美”是听泰人心中的梦想。一腔的热情，一心的执着，连飘动的白云也给感染，幻化成有力羽翼，携带这一份真挚的希冀，向着湛蓝晴空，展翅飞翔，奔往梦想实现的地方。

● 我们一直致力于行业领航，总是在寻找行业新的方向！我们有责任去创新这个行业、开拓这个行业。我们深信，坚持就是胜利！争创行业第一品牌，缔造听泰辉煌！

“With capability, let life become comfortable, and by relying on masterpiece, let human settlements reach perfection” is the dream in the hearts of the Xintai people. Their full enthusiasm and wholehearted perseverance even infect the waving white cloud, which changes into strong wings, carries this sincere hope, and towards the nature clear sky, spreads the wings and fly, and goes straight to the place for realizing the dream.

“We are always devoted to the industry’s navigation, always look for the industry’s new direction! We have responsibility to innovate and open up this industry. We are deeply convinced that perseverance means victory! Serve for the industry’s first brand and found the brilliant of Xintai.

- 佛山市听泰装饰材料有限公司座落于珠江三角洲的腹地——南海里水镇，是一家专业生产幕墙铝单板、异型天花板、造型装饰材料及金属喷涂的专业性公司，集生产、设计、安装一条龙服务的现代化企业。

- 公司成立之初即本着“想客户之所想”，“急客户之所急”，“忧客户之所忧”的经营理念，公司得到迅速的发展壮大。先后从世界各地引进的电脑数控钣金加工设备，全自动喷漆生产线，日本兰氏、瑞士金马喷枪，专业生产、设计各种内外金属单层铝塑板、金属铝合

- 合天花板、金属铝蜂巢板，产品多样化，表面色泽均匀细腻，具有耐腐蚀、耐震、抗折等特点。

- 为适应公司全方位销售战略方针，公司在全国各大中城市设有办事处或代理处，产品销售遍及全国各地，深受广大客户的一致好评，并成功设计和承造数百项重大工程项目。

- 在成绩面前，听泰公司不骄不躁、务实、开拓、进取。以建设世纪品牌为己任，并衷心希望广大家户和同行光临指导，共同创造装饰行业又一高峰。

Xintai Decoration Material Co.,Ltd. is located in Lishi Town,Nanhai,the hinterland of Pearl River Delta. It is a professional modernized enterprise integrating production, design and construction.

* Since its establishment, the company has been basing on the operation concept of "concern what the customers concern, meet what the customers want and worry what the customers worry about" therefore, it has achieved rapid growth and expansion, it has successfully imported advanced computer numerical control metal-sheet processing equipment, fully automatic spraying coating line from other countries Japan and Swiss GEMA spraying gun for specialized production and design of various interior and exterior metal single-layer aluminum curtain wall plate, metal aluminum alloy ceiling plate, metal aluminum

cellular board. The products are characterized by product diversification, uniform and fine surface layer and resistance against corrosion, wear and bending.

* To adapt to the all-around sales strategic guideline of our company, our company has set up offices or agencies in large and medium cities through the country with the products spreading over different places in China. Our company has won the favorable comment of the customers and has been successful in designing and constructing hundreds of key projects.

* Before achievements, Xintai Co. remains unpretentious, practical, pioneering and enterprising, takes construction of century brand as its own mission and guidance of customers and counterparts so as to create a new height of decoration industry.

Xintai decoration New-type building material

产品 / 介绍

新型建材

- 昕泰铝单板是采用优质铝合金板材为基材，经数控成型、表面氟碳处理的一种新型轻质建筑装饰材料。其构造主要由面板、加强筋和角码等部件组成。
- 特点：1.重量轻、刚性好、强度高；2.耐候性和耐蚀性好；3.工艺性强，可加工成平面、弧形和球面等各种复杂几何形状；4.涂层均匀、色彩丰富多样，大理石纹和木纹色足以达到以假乱真的效果；5.不易玷污，便于清洁保养；6.安装施工方便快捷，应用广泛；7.可回收再利用，属绿色环保建材。

*The Xintai aluminum veneer is a new-type light building decoration material with high-quality aluminum alloy plate as its base material and through numerical control forming and fluorocarbon surface treatment. Its structure is mainly made up of such parts as faceplate, reinforcing ribs, corner fasteners, etc.
*Characteristics: 1. Light weight, good rigidity, high intensity; 2. Good weather resistance and corrosion resistance; 3. Strong craftsmanship, can be processed into various complicated geometrical forms such as planes, arcs, spheres, etc.; 4. Its coating is even, colors are abundant and various, and its marble grain and wood grain are enough to reach the effect of mixing the spurious with the genuine; 5. It is difficult to stain but is easy to clean and maintain; 6. Its installation is convenient and swift, and its application is extensive; 7. It can be retrieved and re-utilized and belongs to the green and environmentally-friendly building material.

节能铝板

- 昕泰建筑节能复合铝板采用特殊工艺制作而成的酚醛泡沫作为芯材，与正反面铝板复合而成。产品具有优异的隔热、保温、防火、隔音、节能环保等优点。昕泰建筑节能复合铝板系统不仅可以满足外墙保温，而且能够满足水密性、抗风性以及温湿度等指标，并可抵抗可能产生的机械碰撞。昕泰建筑节能复合铝板安装方式类似于铝合金单层幕墙板。免去了外墙保温常规在墙体表面另装保温材料的做法。具有降低成本、安装简便快速、效率高等特点。是新一代建筑节能产品的佼佼者。

*Xintai building energy saving compound aluminum plate applies bakelite as core which is made of special technique and is laminated with aluminum plates. The product has many advantages such as heat insulation, thermal insulation, sound insulation and energy saving. Xintai building energy saving compound aluminum plate system can not only meet the requirements of external wall heat preserving, watertight, wind pressure resisting, etc., it can also resist possible mechanical shock. The installation of Xintai building energy saving compound aluminum plate is the same as Xintai aluminum alloy single layer curtain wall, therefore, it doesn't need to install heat preserving material on the wall surface, and features cost effective, fast installation and high efficiency as the outstanding role for new generation building energy saving product.

- 超薄型石材蜂窝板是听泰引进的意大利切割设备和技术。利用天然的花岗岩，大理石切成3~5mm厚的薄片，再利用法国航空复合技术将之与粗纤维生产的高料含量产品。超薄型石材蜂窝板保持了天然石材的美观，克服了天然石材易碎，重量大等特点。由于在石材薄片与粗纤维之间加上优质铝板作为过渡层，使产品耐冲击性变高。该产品已达到国际领先水平并填补了国内空白，广泛用于建筑幕墙及室内外装饰，是当今世界上最先进的绿色环保材料之一。

*With imported advanced cutting and grinding machines from Italy, Xintai first cuts granites and marbles into 3-mm veneer, then bonds the stone veneer with aluminum honeycomb structure to form honeycomb panels with imported aeronautic bonding high-tech from France. Xintai super-thin stone honeycomb panels maintain the beauty of nature marbles and granite with overcome their fragile and heavy disadvantages. Xintai puts an aluminum sheet between the stone veneer and aluminum honeycomb, so that the products have good impact resistance and flexural strength. Xintai super-thin stone honeycomb panels is in a world leading role and is the first one in China, which are widely used in building cladding wall and interior and exterior decorative materials.

Double-curved Aluminum veneer

产品 / 介绍

双曲铝单板

● 随着建筑物外形风格的多样化，双曲面铝单板已越来越受到业主和幕墙设计者的青睐。由于其加工难度大，能生产双曲面板的厂家又很少，很多工程只能放弃原有设计方方案，导致幕墙的整体效果难以准确表达出设计师的设计理念。

● 听泰人不断探索，自主创新，利用蒙皮拉伸技术和三维建模原理，解决了铝单板行业的难点技术——双曲面铝单板的生产、设计工艺，成为国内为数不多的真正能批量生产双曲面铝单板和复杂异形板的企业之一，为设计师提供了更为广阔的想象和设计空间。

● 听泰双曲铝单板的设计先进，工艺精湛，品质优良，交货期短。板面效果比常见的通过分割焊接生产的双曲板平整度好，安装效果比所谓的“以直带曲”等双曲的弧线调滑，充分展示了双曲面铝单板在金属幕墙上有可替代的独特魅力。

* With the diversity of external styles of building, double-curved aluminum veneer has become increasingly popular to the house owner and curtain-wall designers. Because of its great processing difficulty, and few factories producing double-curved, many projects have to give up the original design scheme, resulting in the loss of the overall effect of the facade.

* Xintai people make bold explorations, innovate independently, resolve the difficult technology of production and design techniques of aluminum veneer in the aluminum veneer industry via skin stretch technology and the principle of three-dimensional modeling, become one of the few enterprises which can batch produce double-curved aluminum veneer and complex shaped veneer, as well as provide a wider imagination and design space for designers.

* Xintai double-curved aluminum veneer has advanced equipment, exquisite workmanship, high quality and short delivery period. The flatness of veneer effect is better than that of the common double-curved veneer made by cutting and welding; the effect of installation is sleeker than that of artificial double-curved veneer "straighten the curved". It fully displays the irreplaceable and unique charm of double-curved aluminum veneer.

铝单板作为幕墙的三大主材之一，

以其良好的加工性能，安装便捷和装饰性能等。

独特魅力，赢得了广大用户和设计者的青睐，和玻璃、

石材交相辉映，给幕墙增光添彩，构成现代都市典雅、华丽的壮美景观。

◆ 铝单板材质及构造

铝单板采用优质铝合金板材加工而成。基材型号通常为3003，状态为H24，其常规厚度为2mm,2.5mm和3mm三种。

其构造主要是由面板、加强筋和角码组成。面板和加强筋通过电焊螺钉联接，使之成为一个牢固的整体。极大地增强了铝单板的强度与刚性，确保了长期使用过程中的抗风压能力和铝板表面的平整度。

◆ 铝单板的表面涂层

铝单板表面采用氟碳涂料喷漆而成，其核心成分是KYNAR®-500氟碳树脂，具有卓越的耐候性和耐腐蚀性，能经受恶劣环境的考验，使用寿命长达十年以上。

◆ 铝单板的特点

- * 重量轻，刚性好，强度高； * 自洁能力强，维护费用低；
- * 耐候性和耐腐蚀性强； * 使用寿命长，涂层保质期十年以上；
- * 加工性能好，可加工成平板、弧形板 * 施工安装方便、快捷；
- 和双曲面板等复杂造型； * 安全性高，不脱层、不剥离；
- * 色彩选择广泛，易于搭配； * 可回收再利用，残值极高，有利环保。

As one of the third main materials for curtain wall, aluminum sheet wins the favors of many customers and designers with its good processing performance, installation and abundant colors selection. Combining with glasses and stone to enhance each other and perfect the curtain wall to form a unique sight of elegance and resplendence of the modern metropole.

Material and structure

Aluminum board uses high-quality aluminum alloy materials. The basic material is model 3003 of H24 in 3 kinds of thickness: 2mm, 2.5mm and 3mm. Its structure is formed by surface panel, strengthening tendon and corner piece. The surface panel is connected to the strengthening tendon through welding screws, making it a complete piece, which largely increases the rigidity and strength of the board, guarantees the wind-resisting resistance capacity and the surface flatness for a long time.

Surface coating of Aluminum board

The surface coating of the aluminum sheet is fluorine carbon spray-painting material. The key ingredient is KYNAR-500 fluorin carbon resin. It is a kind of materials with excellent weathering and corrosion resistance capabilities, it can stand the abominable environment, its lifetime is over 10 years.

Features

Light, good rigidity, high strength;

Excellent wear and corrosion resistance capabilities;

With a good processing capability, can be processed into flat sheet, curved sheet and double-curved surface panel etc.

With a variety of colors, easy for matching;

High self-cleaning capability, low maintenance cost,

Long lifetime, the guarantee of the coating is over 10 years;

Safe, convenient and fast installation;

With high safety, the sheet doesn't come off or fall down;

Recyclable and reusable, environment-friendly

◆ 性能检测

单层铝幕墙板是取铝合金面板为基材，经过预处理后，涂装上底层漆，颜色面漆，表层采用氟碳喷涂而成。

PERFORMANCE TEST

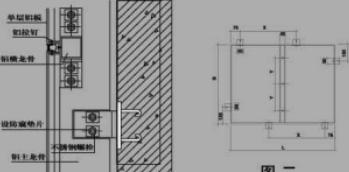

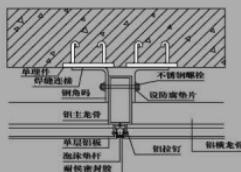

Aluminum curtain wall Panel is made of the A-alloy face plate as the backing, painted with prime and colorful finish after pretreatment, and sprayed with the carbon fluoride on the surface.

Aluminium Honeycomb board

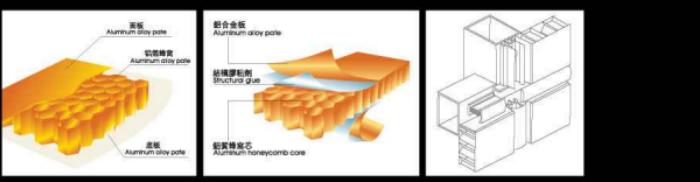

铝蜂窝板 / 幕墙

◆ 产品介绍

昕泰铝蜂巢复合板，是采用目前国际先进的航空科技结合先进的全自动化生产设备，将铝板与铝蜂巢芯紧密地粘合的一种高科技环保型装饰材料，主要应用于大厦外墙装饰（特别适用于高层建筑）内墙天花吊顶、堆壁隔断、房门及保温车厢、广告牌等。实为现代装饰首选材料。

Product introduction:

Xintai aluminum honeycomb compound board is a kind of hi-tech and environment-friendly decoration material by closely binding aluminum board and aluminum honeycomb core, which is manufactured by fully automatic production equipment integrating internationally advanced aviation technology. It is mainly applied in building outer wall decoration (especially high-rise building), inner wall suspended ceiling, wall partition, door, heat preservation carriage and billboard etc. It is a preferred modern decoration material in deed.

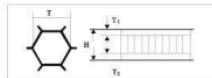

产品特性：Feature :

- 材质轻 Light weigh
- 刚性大 Rigid
- 强度高 High Intensity
- 耐腐蚀 Corrosion resistance

- 防火 Fireproof
- 隔热 Heat insulation
- 加工性能好 Excellent processing performance
- 维护成本低 Low maintenance cost

产品构成形式：Products Form :

- H : 表面厚度
- T : 表面厚度 (顶层)
- T₁ : 底板厚度 (底层)
- T₂ : 增强芯材厚度

U-type Suspended ceilings

通透式U型/天花

◆ 安装方法

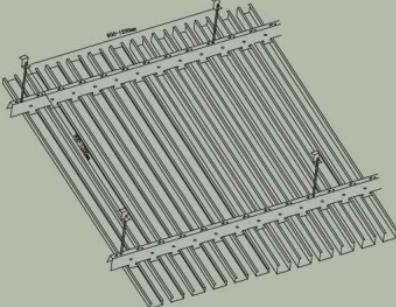

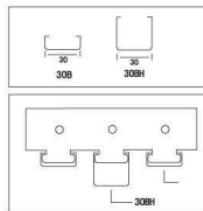

- 按设计的要求测量出通透式U型天花安装后的高度，确定水平线，同时在四周墙体同一水平线上固定好收边角。
- 确定施工方向，并按标准1200mm距离在天面墙体上打吊装孔，同时用膨胀螺丝固定角码吊杆。
- 固定轻钢龙骨的吊件及轻钢龙骨，将轻钢龙骨调至水平，相互平行，间距为标准1200mm。

INSTALLATION METHOD:

- Measure the height of the required U type ceiling according to the requirement of the designer, determine the level line, and at the same time fix edge angle parts on the surrounding walls at the same level line.
- Determine the construction direction, and then make hanging holes on the walls around the ceiling with a space of 1200mm between each hole, and use expansion screws to fix the corner irons with hanging rods.
- Fix the lightgauge steel joists and their hanging pieces, adjust the lightgauge steel joists to level, they should parallel to one another with a standard space of 1200mm between any two grids.

格栅天花系列 Grid ceilings

◆ 安装方法

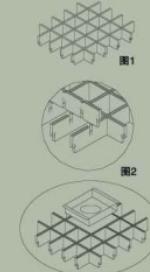

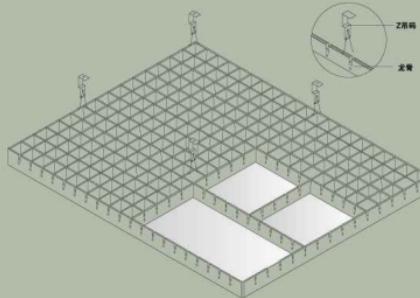

- 先用38#系列轻钢龙骨（或万能角铁），拉好龙骨架水平（或骨架隔2-1.5m）
- 将格仔天花在地下先分片预装。
- 将格仔天花板直接与底盒卡口连接。按照格仔天花固定的尺寸。用专卡码连接在38#轻钢龙骨上（或万能角铁上）。
- 将预装好的格仔天花连接格仔主骨，稍调整好水平面即可。

INSTALLTION METHOD:

- Firstly, use 38# series lightgauge steel joist (or universal angle iron), arrange the grid frame in level (or with a space of 2-1.5m)
- Preinstall the grid ceiling on the ground separately.
- Connect the main grid of the grid ceiling directly with the bayonet, use dedicated clip pieces to fix the ceiling to the 38# series lightgauge steel joist (or universal angle iron) according to the dimension of the ceiling.
- Connect the preinstalled ceiling to the main grid, and then generally adjust the level.

昕泰以品质制胜，建筑恢弘磅礴。就是喜欢这种站在几千公尺融入蓝天的无与伦比的享受。心和云同在一个高度，超凡脱俗，爱的就是这种感觉。

Xintai reflects an imposing manner with quality, making a building look boundless. We like this unparalleled enjoyment of standing at a height of several kilometers and incorporating the blue sky, making the heart and the cloud at the same height, which is extraordinary and refined, so love is this kind of feeling.

仿木纹系列 WOODGRAINING SERIES

◆ 产品特性

这是一种效仿大自然而又超越大自然的产品。它独特优点在于：丰富的色彩和表面纹理效果，能长期日晒不褪色、不变形、不脱落的杰出性能。其特有的分子结构，阳光中的紫外线透过率仅为千分之一，使产品的抗老化性和耐候性远远超过其它任何一种喷涂产品。用它对各种铝型材及其他金属材料表面进行加工装饰，从而实现新的设计理念。

Feature :

It is a product that mimics the nature but surpasses the nature. Its unique advantage lies in its abundant colors and surface texture effect, which can have the remarkable performance of color fastness/no cracks and no peeling off in long-term sunlight. Its special molecular structure has a low rate of transmittance of ultraviolet rays approximately only 1/1000, making the aging resistance and resistance to weathering of products far exceed any other spray-coating products. Using it to process and decorate surfaces of various aluminum extruded sections and other metal materials can help realize new design concept.
